Subject: Phone Call from Robert Steele - Nephi Gypsum Mine Plan Update

I received a telephone call from Bob Steele this morning informing me that he would not be able to make the 10:00 am meeting we had scheduled. He said he had injured his back and broken a couple ribs unloading a bucket of boulders several days ago. He is not able to get around very well and is pretty much out of commission at present time.

I asked him what he had been able to accomplish with regard to our request for updated mine plan information on the Nephi Gypsum Quarry. He said he had received a bid from an independent 3rd party contractor on reclaiming the mine site. He said he had broken the site into 3 main project/reclamation areas and asked for cost estimates on each area.

Mr. Steele stated he also had a revised map prepared which presumably identifies the reclamation treatments for the disturbed areas. He stated he did not have a revised reclamation plan prepared because he didn't think he needed to change his existing plan very much.

I asked him to send us all the information he had prepared, which he agreed to do. He anticipated getting this information to us by the middle of next week. He also stated he hoped to come in to see us with a new small mine notice sometime within the next two weeks.

A copy will be sent to the mine file. - M/023/011
